## RECORD COLD AND LATE SUMMER SNOW SEPT 10-12 2014

An unseasonably strong surge of cold air moved into Montana and Wyoming September 10, 2014 and produced heavy snow late on the  $10^{\rm th}$  and early on the  $11^{\rm th}$ . This snow cover then contributed to very cold temperatures when skies cleared on the  $11^{\rm th}$  and  $12^{\rm th}$ . Sheridan County Wyoming was the epicenter of this event with 14 inches of snow in the foothills and temperatures falling below 20 degrees earlier than any other year in history.

Story, Wyoming

Roscoe, Montana

## ...SNOWFALL AMOUNTS...

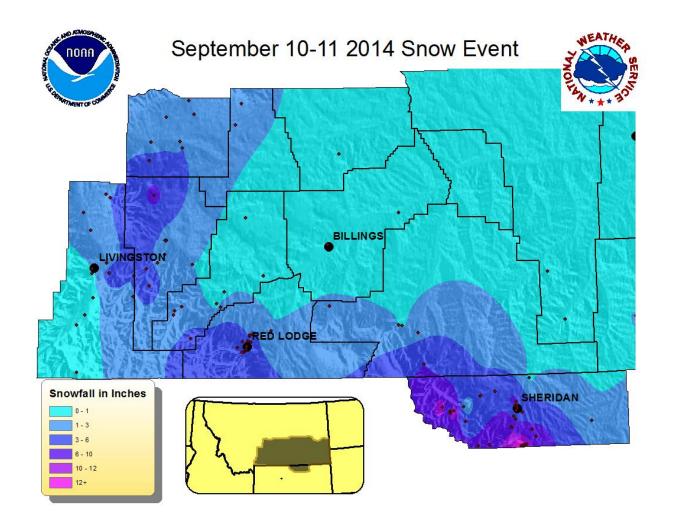

...FOR EVENTS THAT OCCURRED FROM 800 PM WED SEP 10 2014 THROUGH 1159 PM FRI SEP 12 2014...

NOTES: LOCATION OF REPORTS ARE REFERENCED FROM CITY CENTER. SNOWFALL REPORTS FROM SNOTEL SITES ARE ESTIMATED.
